Dear Guest!

Welcome to our gardens! We hope that you will have a great time here. You can walk, see sights, eat ice cream, admire and smell flowers, listen to the rustle of tree leaves, create bouquets from autumn leaves, read a book on a lounger, or try to find your favourite spot...

Remember, the Łazienki garden is our home, so we will definitely see each other more than once. Here we hunt, build our homes, and take care of our offspring.
Don't forget we are wild animals. Please respect our space and our ways.

Please don't follow me, when I'm wandering off.
Don't pluck my feathers!
I moult at the end of summer –
then you can find my feathers in the grass.

PEACOCK

sunflower seeds,
oats, wheat

Please don't feed me bread.
It makes me sick.

DUCK

sunflower seeds,
boiled vegetables without
salt (carrots, potatoes)

Don't leave it for me in the garden.
I can find food myself.
Only watch me from a distance.

FOX

is a great hunter
and doesn't need
feeding

MOUSE

sunflower seeds,
millet, oats

From spring to autumn we gather our food ourselves, but we need help to survive winter.

GREAT TIT
NUTHATCH
BLUE TIT

sunflower seeds,
pork fat without salt,
lard with seeds

There's plenty of food in the pond, so please don't throw bread there - it contaminates the water.

CARP

doesn't need feeding

Don't try to pet me. My teeth are sharp and I can bite!

SQUIRREL

hazelnuts,
walnuts,
sunflower seeds

What do we eat?

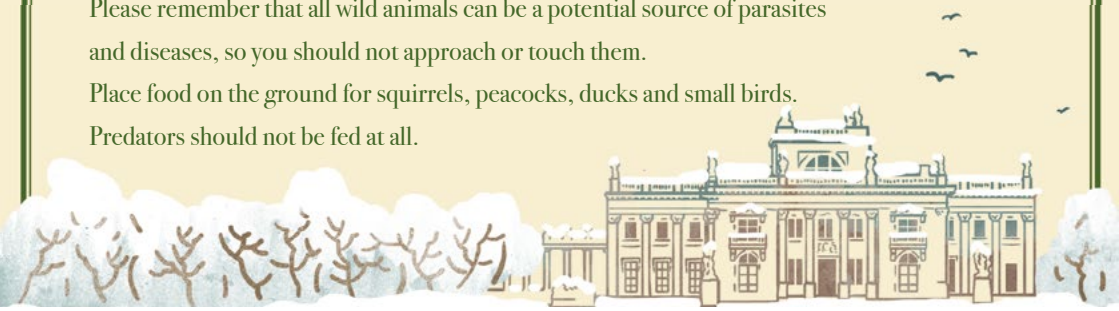

In the wild, we don't eat human food, so we ask you nicely **not to feed us with it**.

Remember: bread, buns, cakes, sweets, and other processed or salty foods make us sick, go bad in our stomachs, and **that hurts us and causes various diseases**.

However, if you would like to give us a treat, please bring:
fruits (apples, pears),
oily seeds (sunflower, pumpkin, flax),
other seeds (millet, oats, wheat),
boiled vegetables without salt (carrots, potatoes),
animal fat (lard),
pork fat (no salt!),
nuts (walnuts, hazelnuts),
dried insects.

We will be most happy with your treat in winter.

Please remember that all wild animals can be a potential source of parasites and diseases, so you should not approach or touch them.
Place food on the ground for squirrels, peacocks, ducks and small birds.
Predators should not be fed at all.
